

Spring Semester, 2021, Faculty of Technology, CEPT University

Course: CT3595: Professional Training
Course Tutor/s: Reshma Shah

Link to CEPT Portfolio :
(studio work from past semesters)

Long Description :

Studio units till 3rd year (Level 2 – L2) build students' abilities around Analyzing and designing; Constructing & specifying; Planning & organizing; and Building arguments & rationales; the further studios units (Level 3-L3) focus on thematic expertise and individual problem-solving ability to tackle complex engineering problems, addressing social, environmental and technical concerns. During these 18 weeks of (full-time) professional training, students will be exposed to the real-time professional world. Students will learn about the critical situations and decision making strategies in various professional fields and organizations. Students will be able to involve themselves, as a part of the team of professionals, in working for the solution of these issues, by applying skills and abilities they have developed in the first 3 years of the study. This experience and exposure will help them to handle more complex engineering problems at the L3 level. The professional training lays emphasis on learning the technical criteria of conceiving and planning the construction projects and then designing and managing the execution of the same.

Course Expense :
(INR -extra expenditure a student would incur during the semester)

INR 50000/- (Fifty Thousand Rupees)

Course Prerequisite:

Student should have finished all L2 studios - only for 2017 batch students

Learning Outcomes :

After completing the Office Internship, the student will be able to :

- Demonstrate understanding of technical criteria of conceiving and planning the construction projects
- Demonstrate understanding of planning and design of construction projects
- Demonstrate understanding of execution of the construction projects

Course Structure :

During these 18 weeks of (full-time) professional training, students will be exposed to the real-time professional world. Students will learn about the critical situations and decision making strategies in various professional fields and organizations. Students will be able to involve themselves, as a part of the team of professionals, in working for the solution of these issues, by applying skills and abilities they have developed in the first 3 years of the study. This experience and exposure will help them to handle more complex engineering problems at the L3 level. The project training lays emphasis on learning the technical criteria of conceiving and planning the construction projects and then designing and managing the execution of the same.

Training can be taken in any professional organization stable in their business as indicated below:

- Engineering consultant
- Project Management Consultant
- Contractors
- Client Organizations
- Research organizations
- International Organizations

Course Assessment :

Exercise : Professional training Joining Report (PJR)	Percentage : 0	Criteria : Student will have to send office joining correspondence on first day of joining the training.
Exercise : Preliminary Information Report (PIR)	Percentage : 5	Criteria : Timely submission and quality of the report
Exercise : Monthly Activity Report (MAR)- 4nos	Percentage : 40	Criteria : Timely submission and quality and content of the report
Exercise : Final Comprehensive Report (FCR) along with completion certification and feedback	Percentage : 25	Criteria : Student must submit a report covering the details of the works accomplished during training. The content should be discussed once with the authorized person in the office of training. The report must include completion certificate of training on company letterhead duly signed by authorized person/s. The feedback form should be sent by the company to the University via email.
Exercise : Jury	Percentage : 30	Criteria : Based on the details submitted, final jury will be conducted within 2 weeks of the last day of training

References :

Will be suggested as per the student professional training office/ site.

Tutor Profile:

Reshma Shah is Associate Professor and Head of UG Program, Faculty of Technology. She is also Coordinator Campus Services. She has a Diploma in Building Construction, Diploma in Construction Technology (equivalent of B Tech Construction) and a PG Diploma in Construction & Project Management, all from Faculty of Technology at CEPT University. She has over 18 years of experience in field of construction, teaching, research and professional consultancy. Reshma has joined CEPT University in 2000 and presently teaches courses on construction materials, construction technology, construction management and valuation. She has been actively involved in monitoring project training of students and have been guiding research thesis regularly. She has conducted national level seminars on construction materials and has organized several training programs for professionals of construction industry. She is also actively working on various consultancy projects of CRDF, now CRDU, CEPT University since 2007. She is Project Coordinator for the award winning project of Mahatma Mandir convention center being constructed at Gandhinagar.
