- **Course Average(COR AVG):** This is the average of the total responses for this course. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.
 - **Individual Average(IND AVG):** This is the average score of the total responses for this instructor. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.
 - **Faculty Average(FAC AVG):** This is the average of all responses for similar course type within the Faculty. For example, Faculty average of Studio IV offered by FA, represents the mean of all responses for Studio courses offered in FA during the given semester.
- Scale: 1 = least agreement with the statement, 5 = most agreement with the statement

Course Comments

Sr No.	Comments
1	The course was a new learning experience.
2	It was good course we learned alot
3	Even though the course outline had structure, we were asked to decide on what we wanted to do in the course. I feel instruction-based learning would have been better. The choice created a lot of disruption along with tutors trying to impose their requirements. I feel the theory and the exercises were detached as we failed to establish connections between our observations due to time constraints. I feel there could have been a fair balance between hours of discussion and work. And when it comes to peer learning and discussion they have to be curated and moderated, otherwise the outcomes will be obscure. I strongly feel there could have been a suggested reading or some exercise as a collective before starting the course. This could have made this course better.
4	This course really made me understand each and every aspect of rural life and the significance of sustainability and vernacular architecture.
5	I really enjoyed the winter school programme. it was a totally new and fun experience!
6	.
7	The different approach taken this time really made a lot of difference.
8	NA
9	The way the course was structured with no clear set of typical procedures which includes just documentation of physical buildings, was really thought provoking. The fact that other set of activities like a visit to the interpretation center, source of water source, stone quarry, creek and other elements that are an inseparable part of local/vernacular identity.
10	.
11	.
12	Very engaging course, a lot of topics were discussed that broaden one's spectrum and view towards architecture and other social factors that surround it. The course provided a good opportunity to explore one's interests and questioned a lot of notions. It went beyond the course brief of documentation, with a lot more thinking on vernacular architecture, sustainability, people, places and culture.
13	The course helped me develop a new perspective not only towards architecture but also life.
14	While the course had mostly promised documenting vernacular architecture, what was really valuable were the varied discourses we had on the vernacular. The tutors promised transformative learning on the first day of the course and at the end of it, it was truly transformative. The course structure allowed us to spend enough time in the settlement individually and as a group. The individual exercises were tweaked for each person according to their level and interest. For this exercise, we were motivated to take something that really interested in and that we enjoyed studying personally. Before every step, we were asked to question why we were doing what we were doing. That really pushed us to think about the larger discourses in the vernacular and connect them with our personal interests. The measure drawing exercise that was done as a group was limited to just two days. Probably, it could have been slightly longer. The tutors ensured a very open environment and free conversations.
15	.
16	Overall had learning of howto measure draw and all.

1	The way he teaches is very interesting.
2	I learned alot from him and the way he always ised to explain things
3	It was very difficult to understand his approach, thought process, and intent. He never gave any solution but instead raised further questions. I learned a lot of new things from him. I indeed experienced his idea of transformative learning. I look forward to discussing the thoughts and ideas with him shortly.
4	sir thoroughly made us understand each and every aspect of vernacular architecture from macro to micro level, from settlement patterns, cluster formation analysis to understanding their daily life patterns and livelihood, reasons for building the structures and how these structures aided in the welfare of the community.
5	Sir has indepth knowledge about the subject and lead us very enthusiastically in the whole course.
6	.
7	-
8	Best faculty.
9	NA
10	The Lead tutor made us all think critically and practically, to question all nuances of vernacular elements of life and other pre conceived notions of architecture and life in a broader sense. This helped us rethink everything about what we take for granted. Which helped us make this course not a typical measure drawing course, but rather a profound perspective providing one.
11	.
12	--
13	.
14	He encouraged critical thinking and helped to develop a new perspective on the vernacular. He also encouraged group activities to foster a sense of teamwork.
15	The tutor really understood each student's caliber and interest. He pushed us to take up things that would really challenge us, constantly questioned everything we did so that we think more. He took personal interest in each student's individual essays and pushed them to move ahead of their levels. He invested a lot of time in everyone's work. He really ensured that we take home a transformative learning experience, we reflect and communicate even our innermost thoughts. He encouraged larger conversations about life and constantly reminded us that architecture is not just about the built.
16	.
17	Good feedback while discussion
