Percentage(%)	100	0	0	0	0	100%

■ **Course Average(COR AVG):** This is the average of the total responses for this course. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Individual Average(IND AVG):** This is the average score of the total responses for this instructor. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Faculty Average(FAC AVG):** This is the average of all responses for similar course type within the Faculty. For example, Faculty average of Studio IV offered by FA, represents the mean of all responses for Studio courses offered in FA during the given semester.

Scale: 1-3: Unsatisfactory, 4-6: Average, 7-8: Good, 9: Very Good, 10: Excellent

What did you like best about this course?

Sr No.	Comments
1	It was well organized and planned course
2	-
3	The process of designing
4	relevant in practical field
5	The interesting way of dealing design with quick model making sessions, and also how the same project had all together different approaches for design.
6	Process of design was interesting and different to see design problem.
7	The content of the course itself
8	The studio was very well structured and involved a lot of exploration exercises which were very useful.
9	Urban exercises
10	I think the best part is building a narrative around a design
11	process of teaching
12	Design exploration through various material

What would you like to change about the course?

Sr No.	Comments
1	Work should not be compare with other students
2	-
3	The emphasis on presentation instead of spending that time on architectural detailing
4	nothing
5	It can be more of detailed and explorative.
6	we can see course as more detailed in design.
7	Nothing
8	-
9	Instead of making many unfinished models we can focus more on the quality of it
10	Some importance should be given to the process of translation of the narrative into the design
11	detailed in design
12	More discussion on practical solution

Course Comments

Sr No.	Comments
1	-
2	-
3	Maybe we could have detailed the project more and critically analysed what we are bulldozing on the site to create anew.

What did you like best about this instructor's teaching method / approach?

Sr No.	Comments
1	Approach to each and every aspect of design from start till end was perfectly taught
2	-
3	The in depth knowledge of the subject. Ability to communicate everything in a manner which was easy to understand.
4	clarity and in depth knowledge
5	the way the concepts were introduced and the studio approach
6	The way we see design problem with context and take in account of surrounding and process of model making in duration was interesting.
7	His time and patience
8	Pratyush sir helped us to develop a clear design position for our project which helped us to develop a lot of perspective. He also encouraged us to experiment and explore with drawings and models.
9	His narrative
10	The way he communicates
11	his way of teaching design process
12	Encouraged for initial idea and presentation

What would be your suggestions to improve the instructor's teaching?

Sr No.	Comments
1	Everyone has different ways to express there design so it should not be compare with others
2	-
3	To be able to look at one's design beyond it's presentation.
4	none
5	nothing in particular.
6	-
7	The feedback and crit was very vague and needs to be specific to the students project
8	-
9	The studio can be more structured before

10	Nothing really.
11	time management
12	It could be more practical solution rather than graphical

Instructor Comments

Instructor Name: Pratyush Shankar

Sr No.	Comments
1	Comparisons within a studio are actually demotivational. Brought it up because you are an amazing faculty otherwise and there's so much to learn from you. Comparisons cause distractions for other students. It's a huge loss for CEPT that you're leaving.

Compared With face-to-face-on-campus learning, using online learning :

I Experienced These Advantages

Sr No.	Comments
1	-
2	The learning was a bit intense and helped us work more efficiently and regularly
3	Less time spent on travel, less money spent on prints and models
4	none
5	quick method of learning
6	-
7	None
8	-
9	Sorry , No advantages
10	Convenience. It is a good way to take lectures
11	new way of learning
12	Improve presentation skill

I Experienced These Disadvantages

Sr No.	Comments
1	It is not a good method of learning
2	we were not able to work on models and other details efficiently
3	Missed on the hands on learning, juries not as easy as the ones held in studios
4	lack of resources like workshop, library, etc. Poor internet connection. No dedicated studio space; homes are not good places for designers to work.
5	there were many as we could not deal with models, and the environment of learning at the campus is more useful as it helps to discuss face to face while working. the weak network was a big disadvantage even for the jury after all the hard work.
6	communication was not clear to understand design problem.

7	No good communication, lost opportunities to create and discuss models or design itself, was another able to work in home conditions
8	It would have been a very different experience if the jury was an online one. The online pattern did not generate enough discussions
9	Connecting issues, less clarity in discussions, less opportunity to interact with other students, hindrance in conversation, couldn't get that mind-set to work
10	A lot of Compilation and consolidation was required because stage drawings too were checked over screen sharing. It reduced relatability. It reduced the scope of making and presenting models. It reduced communication.
11	communication , lack of proper design process
12	Communication issue, quality of work and discussion we get in class is not matching with online class, felt like learning from YouTube tutorial, totally disagree with online juries

Suggestions for improving the online studio learning experience

Sr No.	Comments
1	-
2	If the same conditions prevail next semester, i would only suggest one thing; no online classes as design cannot be taught and learnt on the screens. Instead, postpone the whole studio to next semester.
3	-
4	Online studio helped us to finish the semester. We could manage it coz three-fourth of the session was completed before the pandemic. I think the final outcome could be lot more better with the regular studio sessions.
5	It's a good way to take theory lectures but not such a good medium to physically discuss designs. The sense of active group discussions and the availability of library along with focussed working space takes away a lot of efficiency.
6	Please no more online studio.....
