

COURSE TITLE : A Place for Water

COURSE CODE : AR2020

COURSE TYPE : Studio	NO OF STUDENTS : 16
FACULTY : Faculty of Architecture	NO OF RESPONDENTS : 16

Course Feedback											COR	FAC
	1	2	3	4	5	6	7	8	9	10	AVG	AVG
The objectives for the studio/workshop were clearly outlined and communicated by the instructor/s	●										8.9	
The exercises assigned were relevant, interesting & challenging	●										8.8	
The studio/workshop helped me develop my ability to understand and analyze problems	●										8.9	
The studio/workshop helped to come up with practical solutions/provided an understanding of lifelike situations	●										8.7	
I acquired new skills during this studio/workshop	●										9.1	
The studio/workshop achieved its objectives & met my expectations	●										8.2	
Overall Rating of Course	●										8.8	

INSTRUCTOR NAME: Meghal Arya	NO OF RESPONDENTS : 16
------------------------------	------------------------

Instructor Feedback											IND	FAC
	1	2	3	4	5	6	7	8	9	10	AVG	AVG
The sessions were held as per scheduled time	●										9.3	
The instructor was available during full session time	●										8.9	
The sessions were held by the instructor as mentioned in the course outline or in the introductory session of the class	●										8.9	
The instructor demonstrated sufficient knowledge (about the main theme or topic)	●										9.4	
The instructor was well prepared for the session	●										9.4	
The instructor was effective in communicating the concepts	●										9.2	
The instructor encouraged conceptual and critical thinking	●										9.4	
Questions raised in session were effectively addressed	●										9.1	
The instructor provided timely feedback on the various components of the course (quizzes, exams, assignments, projects, and class participation)	●										8.7	
Overall the instructor did an excellent job in teaching this course	●										9.1	
Overall Rating of Instructor	●										9.1	

STUDENTS REGISTERED BY FACULTY

No. of Students	16	0	0	0	0	16
Percentage(%)	100	0	0	0	0	100%

■ **Course Average(COR AVG):** This is the average of the total responses for this course. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Individual Average(IND AVG):** This is the average score of the total responses for this instructor. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Faculty Average(FAC AVG):** This is the average of all responses for similar course type within the Faculty. For example, Faculty average of Studio IV offered by FA, represents the mean of all responses for Studio courses offered in FA during the given semester.

Scale: 1-3: Unsatisfactory, 4-6: Average, 7-8: Good, 9: Very Good, 10: Excellent

What did you like best about this course?

Sr No.	Comments
1	The tutors
2	I definitely enjoyed the challenges that this course threw at every corner and pushed me to my limits. It drove me to look at every source of information that i could access.
3	The change in the brief wasn't expected, but it was worth the risk. It gave us new insight into design basics and opened up new perspectives.
4	Preliminary exercise
5	...
6	Hand drafting of drawings was good part.
7	incorporating two design problems detailed understanding of structure
8	Everything
9	-
10	Have more discussions and sessions with different professors
11	.
12	j
13	This course provides good amount of knowledge towards real architecture.
14	Faculty's teaching approach
15	-
16	The best thing about the course is that it gives knowledge of not just design but also climate, architecture language, & structure.

What would you like to change about the course?

Sr No.	Comments
1	Nothing that comes to mind. Probably the name of the studio.
2	Somehow I felt that some of the exercises that were given during the course were either unnecessary or were given more time than they required in my opinion. The time given for the massing models and the relationship diagrams was a little too long. At the same time, I felt in the pursuit to come up with a certain requirement for the models or diagrams, the search for a core idea that would anchor the entire design was perhaps overlooked in the case of some of my studio mates, which was pointed out in the mid-semester review.
3	-
4	There was no emphasis on water
5	...
6	In final presentation hand drafting drawings should be use not digital.
7	hand drafting was greatly beneficial, but for the last week before jury there should have been the shift to digital drawings. the shift to digital drawings after the jury did not work well
8	Nothing
9	-
10	Have a better equipped teaching assistant.... She was not able to bridge the gap between the faculty and the students and found it
11	.
12	The breif was not clearly conveyed in terms of the objective of the studio. There was no designing related to the water but was related to the designing surrounding the water body.
13	-
14	Everything is good
15	-
16	More emphasis could be put on water and how it could be seen as an architectural element.

Course Comments

Sr No.	Comments
1	While I do understand that going through a complete set of drawings and a model led to a lot of clarity and realization, I personally felt that at times there was unnecessary comparison with others regarding the quantum of without evaluating how much the design has actually evolved. This comparison led to the learning atmosphere being rather unpleasant. Some of the studio mates behaved rather selfishly, trying to get their work done off of others while the ones who tried to help out became scapegoats. It is sad that through most of the semester, I can count on the fingers of one hand, the people who have actually asked me about my design and what my intent is, rather than just "kitna kaam hua"? Some of the time problem exercises were put in impromptu, breaking my workflow multiple times. Regular submissions would have also helped streamline things towards exhibition week. It is not fair that during final Submissions of mandatory courses and during final jury week, we are expected to spare time to upload the entire semester's work. Also, I felt it difficult when both the faculty came at different times and did not update on each other's feedback. I found it difficult to work on two separate feedbacks taking different approaches on consecutive days. The TA also needed to be updated regularly or the faculty needed to communicate better with the TA or they needed to communicate directly with the students. Multiple times there has been confusion regarding assignments or requirements, where we have completely misunderstood the assignment because of miscommunication
2	-
3	Disappointing outcome
4	Na.
5	the element of water was not talked much upon
6	.
7	-
8	.
9	not for the course but for the TA, she should know what job is she provided. She should behave like that. I training a proper trailing for the TA should be provided to them.
10	-

What did you like best about this instructor's teaching method / approach?

Sr No.	Comments
1	Succinct, concise, no-nonsense
2	A lot of space was given for experimentation and free thinking. Her thoughts were never imposed on anybody but she would always ask questions leading me to think about what all I should consider and what I could do.
3	Ma'am, let us do our own design without interruption of her own ideas
4	Did not impose
5	...
6	Mam helped throughout the semester to encourage us and help in downfall.
7	the amount of freedom that the faculty gave us was incredible her experience was extremely beneficial in developing our design thinking
8	Its best
9	-
10	Crisp comments always straight to the point
11	.
12	the way she put the pressure in terms of the thinking a particular problem of the design and giving hints of that.
13	Giving complete freedom towards design
14	Her schedule
15	-
16	The way concepts were cleared from basics and encouraged us to push our limits.

What would be your suggestions to improve the instructor's teaching?

Sr No.	Comments
1	None that come to mind
2	While i do appreciate the freedom given to me, I have never been given a personal discussion for more than 2 minutes at any time. While I do trust her judgement, i cannot help but think how much more i can learn if she would discuss with me for 10 15 minutes personally like she does with some others, instead of being absolutely clueless. Isn't it not fair that some of the students get longer discussions to go ahead, while I am struggling with the limited discussion I have had, while maybe i could have gone further much further with a longer discussion? This was the case no matter the quantum of work I had.
3	She could be a little more pushy on what direction the students are leading. To let us on our own completely sometimes makes us feel lost and anxious.
4	More interaction and feedback
5	...
6	Na
7	the faculty was perfect in all aspects however the time durations of her presence were quite limited
8	Nothing
9	-
10	Have more sessions with her
11	.
12	I think hand drafting is the best for the learning the scale and proportions but for the final drawings which were meant only for the jury should be digitised so that it helps at the exhibition time.
13	-
14	Nothing. She is the best.
15	-
16	None.

Instructor Comments

Instructor Name: Meghal Arya

1	I unfortunately felt there was some partial treatment meted out to some of the students. It is not fair that some students get longer detailed discussions: because they have a full set with little evolution or in some cases incomplete work some others get a severe scolding. I think it is only fair to give discussions based on how much has been done from the previous checkpoint keeping in mind the nature of changes that had to be implemented. Or if a full set is a requirement it stays a requirement. While I do understand that as a faculty she pushes her students, she does have to understand that after a point it becomes ruthless and hampers the students' self-confidence. P.s. I cannot deny the fact that I have learned a lot about myself and architecture from her and for that I will forever be grateful. She definitely taught me how to self-critique building my self-confidence. I have begun to look into the depth of any design I see, beyond the pretty graphics, while also understanding the importance of good presentation. Most importantly, I have learned to make decisions and deal with the consequences rather than be confused and stagnant. Thank you once again for being the hard taskmaster, pushing me out of my comfort zone.
