■ **Course Average(COR AVG):** This is the average of the total responses for this course. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Individual Average(IND AVG):** This is the average score of the total responses for this instructor. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Faculty Average(FAC AVG):** This is the average of all responses for similar course type within the Faculty. For example, Faculty average of Studio IV offered by FA, represents the mean of all responses for Studio courses offered in FA during the given semester.

Scale: 1-3: Unsatisfactory, 4-6: Average, 7-8: Good, 9: Very Good, 10: Excellent

What did you like best about this course?

Sr No.	Comments
1	-
2	.
3	Given time to understand and learn concepts
4	Loved how practical problems were discussed throughout the semester. The course helped me look at buildings deeper than merely their aesthetics.
5	-
6	The scope CRA carries is immense and can be revolutionary if executed thoughtfully. The course was really good focusing in the core purpose.
7	Faculty is very good
8	I liked everything, from the one on one discussions in class to questions that were raised and debates that were held, everything was carried out in a structured and great way
9	-
10	-
11	There was a lot of learning in this studio, along with very fruitful discussions and interesting questions and answers in the lectures and exercises.
12	I liked how the discussions were in a group, so the learning was more.
13	It is very practical and helps cover basics on all topics
14	The studio taught me the technical aspects of climate like reading and understanding the sun path, and wind direction and observing techniques used in daily life to respond to the climate that I would not otherwise notice.
15	FACULTY
16	-

What would you like to change about the course?

Sr No.	Comments
1	Should have more technical or software simulations
2	.
3	Include more exercises related to climate that could help with the fundamentals.
4	Maybe the course needs to focus more on technical aspects as well.
5	-
6	would have been nice if different International climates and the vernacular architecture practiced there could also be integrated.
7	Start the final design process earlier
8	Nil
9	-
10	-
11	Maybe a more structured approach to the design process.
12	I think it was a bit rushed towards the end. More time could have been given to refining details and representation.
13	The workload is too much in the end
14	Some other relevant exercises where we could first design on a smaller scale since it was our first time designing, could be added rather than just several case studies. The local case studies could have been reduced. Also, studio hours could be used for working, while getting feedback simultaneously rather than long discussion sessions.

1	-
2	.
3	The structure of the course could be improved. In terms of time given for final design and strict guidelines and timelines could be put in place for the earlier exercises. (These would help in preparation for the later final design and also ensure proper time to learn the basics)
4	Absolutely loved the course. Everything taught from the beginning of the semester, to the end was very helpful. Found the lecture classes extremely helpful as it brushed upon concepts of science that we had previously learnt in school while introducing us to more new concepts. The course has given me a new perspective towards buildings.

8	Nice one
9	-

What did you like best about this instructor's teaching method / approach?

Sr No.	Comments
1	-
2	.
3	Helped and supported ideas that helped to think out of the box
4	Loved the method of his teaching, the way he gets across the concepts. He often tends to personify things which makes it more interesting. He is also very knowledgeable. Made sure to make every lecture very interactive, interesting and lively.
5	Friendly and easy to approach

6	The ideas and hints given by him were very helpful and worthy. He helped us see the design in a practical world.
7	He has a very strong knowledge base
8	His ideas and thoughtful answers that always hit the point were amazing
9	-
10	-
11	I liked the enthusiasm and presentations as well as critical thinking that was encouraged.
12	-
13	Very practical approach and really helps with developing your idea
14	I like how they explain the concepts by posing it as a question, which makes it interesting and encourages us to think rather than just listen to facts continuously.
15	Nice
16	-

What would be your suggestions to improve the instructor's teaching?

Sr No.	Comments
1	-
2	.
3	NA
4	nil
5	-
6	I feel like the course has many concepts beyond what is being explained in class. It would be nice if they could introduce more topics in the future.
7	Na
8	Nil
9	-
10	-
11	Not much, maybe a more structured approach to design process and more clear instructions.
12	-
13	To include more software based knowledge which could make certain design processes more efficient
14	nil
15	Nothing
16	-

4	Hiten sir is a very approachable faculty. He cleared all our doubts and helped us when we were stuck. He encouraged us to ask questions and gave us very practical solutions. Discussions with him encouraged us to think further over specific matters. His energy and enthusiasm while teaching clearly shows his passion towards the subject.
