

COURSE TITLE : Design Fundamentals of Spacemaking

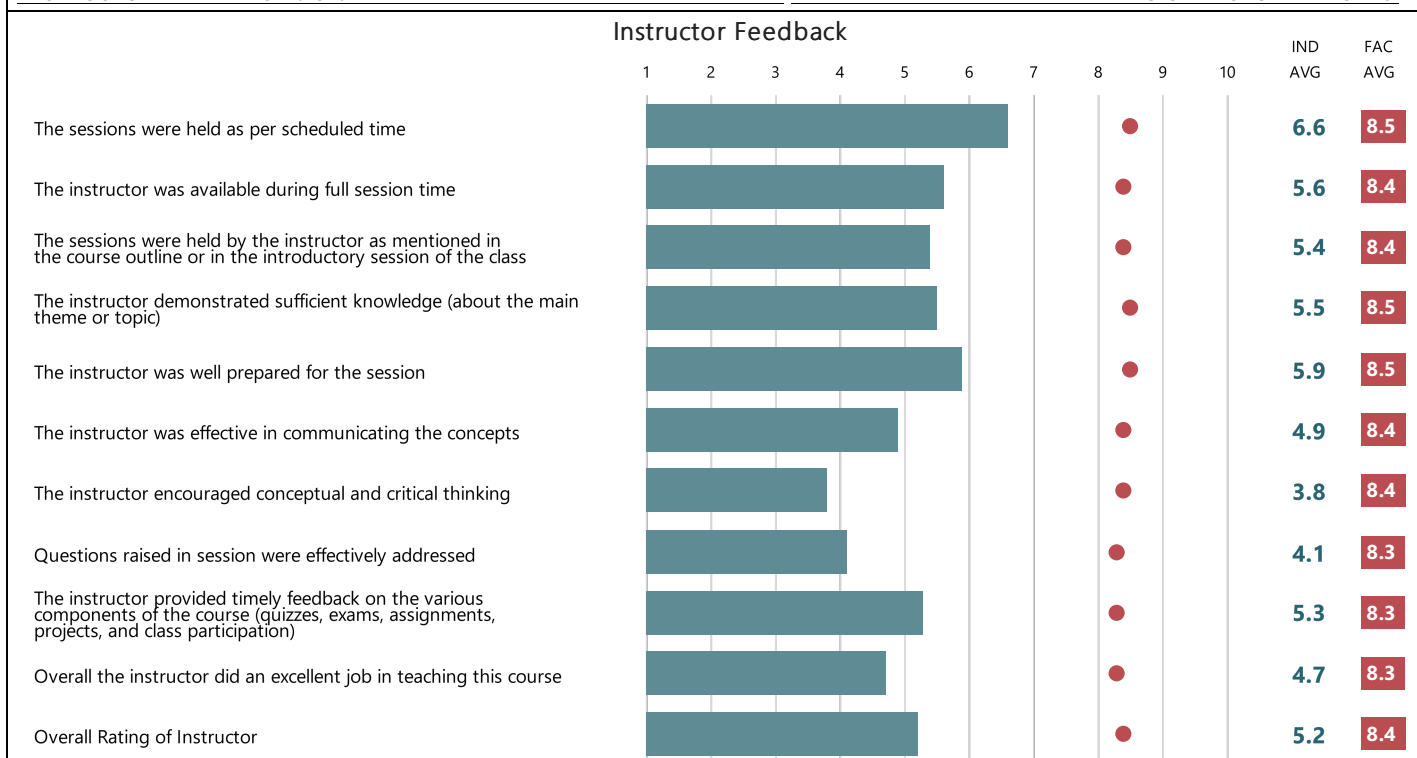

COURSE CODE : AR2029

COURSE TYPE : Studio	NO OF STUDENTS : 16
FACULTY : Faculty of Architecture	NO OF RESPONDENTS : 16

INSTRUCTOR NAME: Krishna Shah

NO OF RESPONDENTS : 16

STUDENTS REGISTERED BY FACULTY

Name Of Faculty	FA	FD	FM	FP	FT	Total
No. of Students	16	0	0	0	0	16
Percentage(%)	100	0	0	0	0	100%

■ **Course Average(COR AVG):** This is the average of the total responses for this course. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Individual Average(IND AVG):** This is the average score of the total responses for this instructor. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Faculty Average(FAC AVG):** This is the average of all responses for similar course type within the Faculty. For example, Faculty average of Studio IV offered by FA, represents the mean of all responses for Studio courses offered in FA during the given semester.

Scale: 1-3: Unsatisfactory, 4-6: Average, 7-8: Good, 9: Very Good, 10: Excellent

What did you like best about this course?

Sr No.	Comments
1	The course allows for a great platform for transitioning from cfp to a L2 studio. The structure of course is well defined with great excercises.
2	The Spatial vocabulary exercise
3	Its best for new comersin this field
4	The positive aspect of the course was the progression of learning, starting from the fundamental levels and advancing to more advanced topics.
5	Very demanding
6	I lerant about the rules of organisation and design priciples which are the basics I needed to learn in this feild.
7	It helped in developing the fundamentals to complex skills needed.
8	What i like is the basic understanding of visualization of spaces and how one experience a space. and how one postion on column /beam or wall can drastically change the one's journey of space. using the method of visualization with making model is what i like!!
9	Initial exercises of spacemaking were explorative and great for beginning as it breaks down the process and has a logical sequence to actual design problem. It slowly brings one to design. One gets a good analytical sense and develops a good sense of decision making when moving further. The studio is for beginners and it helps open one's mind to interesting forms and theories. In terms of representation, complete process from sketches, drawings, 3d views and model making was followed for even the smallest development. It integrates model making well in the design process by using it as a tool to visualise and make design decisions.
10	Design Thinking
11	.
12	the basic understanding of space making was taught during this couse very nicely
13	Nothing specific.
14	-
15	.
16	The studio structure is very helped us to start from fundamentals and use those techniques further in the final design

What would you like to change about the course?

Sr No.	Comments
1	More site visits. we only had one which didnt allows us to connect well with the site.
2	It's hybrid mode .
3	Nothing
4	Maybe the amount of control which faculty keeps in their hand rather then giving the children any freedom.
5	Very demanding
6	The site chose for the design programme of the studio could be changed. Taking the same site for the past three times, the designs seem to be repetitive, there is not much scope for creativity
7	The outline of the course can be more detailed and refiner
8	I think the case study should be include for all rather then just chosen one's. and also give time to stduents to explore for themselves even if they are wrong rather then giving them hand writing final statement..
9	The process of making by learning and the approach that this course had was interesting and unique, students could have made the most out of it had there been the awareness in them of where they were eventually being led. Perhaps that communication got lost in the limited time and chaos of online classes.
10	Faculty
11	.
12	the exercise of vocabular seems to be too long it can also involve as it was earlier in the course the case study of a physical building in ahmedabad
13	The tutors.
14	-
15	.
16	There is a lot of spoon feeding and a lot of faculties interference in everyone's design that does not allow someone to think about it themselves and will end up doing what faculty says every time.

Course Comments

Sr No.	Comments
1	.
2	Repetitive
3	I feel like the topic of the course about the fundamentals of design is very crucial and important, which is conveyed accurately in the first few weeks of the studio. But the application of these learnings in the design program fell short.
4	no
5	.
6	The tutor's biasedness to students who does well in studio alone. Apart from that, the tutor's restrictions and imposing nature to the students.
7	.
8	.

What did you like best about this instructor's teaching method / approach?

Sr No.	Comments
1	Knowledgeable. Passionate
2	.
3	Nothing
4	-

5	Very detailed reviews
6	-
7	The teacher was available through out the studio. She was very helpful and provided timely feedback.
8	NOTHING
9	Faculty was approachable at all times, outside of studio hours as well.
10	nothing, she just doesn't respect the student's approach towards design and forcefully give us her design to follow on.
11	VERY BAD ATTITUDE. AVOID PEOPLE SHE DONT LIKE ONLY FOCUS ON SOME STUDENTS.
12	the way she gets involved in the design process to get best out of each student was great.
13	Nothing much.
14	-
15	.
16	She gives a lot of time to the studio and students

What would be your suggestions to improve the instructor's teaching?

Sr No.	Comments
1	Crude bias, should not be a part of an faculty.
2	Her behaviour towards students.
3	.
4	It would be preferable for her to adopt a more listening-oriented approach rather than being imposing. Additionally, she should exhibit greater respect and consideration when engaging with children, both in conversations and while listening to their ideas.
5	A little bit sympathy
6	She was trying to impose her ideas and designs on the students rather than letting them solve the problems on their own and coming up with original ideas. This way of teaching could be changed.
7	She could focus more on making concepts clear rather than imposing. Sometime it's hard to go through the teachers design.
8	??? Giving Space student to explore ??? Get away from that dominating attitude ??? Partiality for Favourites should not be acceptable
9	We were guided thoroughly on the design process and evolution of concepts, which was great, however it would have been a better learning process had the students been given the chance to explore concepts and then arrive at their choices. Had the discussions been along the lines of what was done by the student and why that did/did not work, would have made the process more enjoyable and enriching. There is a very clear idea of what needs to be produced and delivered, which leads to standardisation of the outcome and individuality gets dissolved. One could never go wrong as everything was double checked, but though wrong, certain decisions should have been left up to the students, as learning that way would be better than not trying at all.
10	She should be more mindful, open, and not always so adamant.
11	CANT HELP
12	She can be little calm and humble towards the students and some times becomes partial for selective students
13	To change the profession of teaching. Recurring feedbacks on the tutor was reported to the tutor to improve the approach but still didnt care to mind. Even in the past, when inquired the tutor did the same. So its better if the tutor gave up teaching in the field of architecture, with still appreciating the fact that she is indeed a better architect.
14	-
15	.
16	She interferes a lot in everyone's design and everyone ends up doing what she wants with their designs

Instructor Comments

Instructor Name: Krishna Shah

Sr No.	Comments
1	It's important for her to recognize that students are here to learn and explore new ideas, not to be treated as mere draftsmen who must comply with her ideas. Students should have the opportunity to contribute to their own designs, and their ideas deserve attention. Her role is to provide input on our designs rather than imposing her entire vision. Additionally, there's a concern about her use of abusive language, and when we express our grievances, we are made to feel guilty. This situation makes it difficult for us to freely express our thoughts and ideas. Furthermore, there's an issue of discrimination towards certain students, impacting the entire class negatively.
2	Passionate about the studio
3	She should not impose her ideas on the students and try to listen to our idea and perceptions. The way she interacted with the students was inappropriate to some extent and unprofessional.
4	Overall she was very nice and helpful.
5	what i like to change in this course is the teaching style or faculty.. and not the course. The dominating attitude. Not been giving time to explore and passing / giving final opinion that this is right Even if we didnt agree on that we have to because of that dominating attitude.. the style of communication and not listening to student ideas and mind is just not right.. and at the end it feels like i am a intern in your workplace and doing what been told... NO its my design!! The partiality for the favourites which should not be acceptable in studio and is clearly seen. a lot of times the one giving hardwork not appreciated bcoz of Partiality in studio and getting Demotivated bcoz of that. what i didnt get from you is the rigor that needed.. even if i want to work i didnt get a chance to discuss bcoz of either your attitude or your favourites...
6	She is not a great teacher, she gave extra panels to people she liked in studio for exhibition leaving some with half the space to put on their work, she has always been one-sided to some students.
7	.
8	Great teaching efforts but the attitude towards the student can be little polite and should be little professional by not messaging at midnight because sometimes its great to get feedback but sometimes students are not in right position to share their work and you should understand that.
9	Its better if she gave up teaching, because of the reasons mentioned above. As recalling Walter Gropius's words, "Mind is like umbrella, it better functions when its open." It was like, she completely ignored this fact and was imposing her ideas upon us, knowing that we are amateur's and we'll fail for sure. As a matter of fact, we are here to learn, and from failing, we'll learn more. The tutor didn't gave the liberty for student mind's and the ones who followed her instructions blindly were favored by her and discussions and marks were followed upon accordingly.
10	.

Compared With face-to-face-on-campus learning, using online learning :

I Experienced These Advantages

Sr No.	Comments
1	none as such
2	.
3	Not much
4	no advantages
5	I could attend session from home
6	-
7	I learnt software
8	The only advantage we have is to Happy that Our faculty krishna Shah is not there...
9	Discussion could happen at anytime of the day.
10	-
11	.
12	i feel full on campus studio would work i didnt found any advantage of online mood
13	Faster feedbacks.
14	-
15	.
16	everyone get an ample amount of discussion

I Experienced These Disadvantages

Sr No.	Comments
1	none as such
2	You can't convey your thoughts on online session.
3	Offline learning is much better

4	we could not really convey our thoughts properly
5	Very difficult to concentrate
6	The discussions were not as intense and fruitful in online learning than in face to face.
7	Nothing
8	The work would be produce more crisp if it would not be online.. the net issues.. the partiality about those favourites to make them discuss first and let the other who are dying for discussions giving them just 2-5 min at last.. does make a lot of difference and imapct on students.
9	Being way past the pandemic, online learning must be discontinued as there is a large disadvantage of online courses. Being able to physically interact with faculties only once a week is too limited a time. There is always a communication gap, hassle of connecting, too much screen time and more time is utilised in figuring out the process of joining than actual learning. Since the studio is centred around model making, discussions on physical models cannot be replaced by digital methods. There is either a connectivity issue, a sound/audio problem, something or the other interrupting the discussion. The physical presence of faculty can occasionally be substituted by online discussions that add to the normal class, but cannot completely be the mode of learning.
10	-
11	.
12	the network issue and the understanding it online mood decreases
13	nil.
14	-
15	.
16	not that interactive

Suggestions for improving the online studio learning experience

Sr No.	Comments
1	nothing as such
2	-
3	If it could be more timely
4	The discussion need to be intense in online learning and the tutors should be able to communicate the concepts in an appropriate way.
5	Nicce
6	I think No online learning should be there.. or at least it will 70-30 ratio for offline/online cause online learning didnt really help..
7	-
8	.
9	The online lectures should be only for quike doubt solving the feedback should be conducted in offline mood only.
10	Nil.
11	-
12	.
