

COURSE TITLE : Span and Space: Exploring Tectonics in Architecture

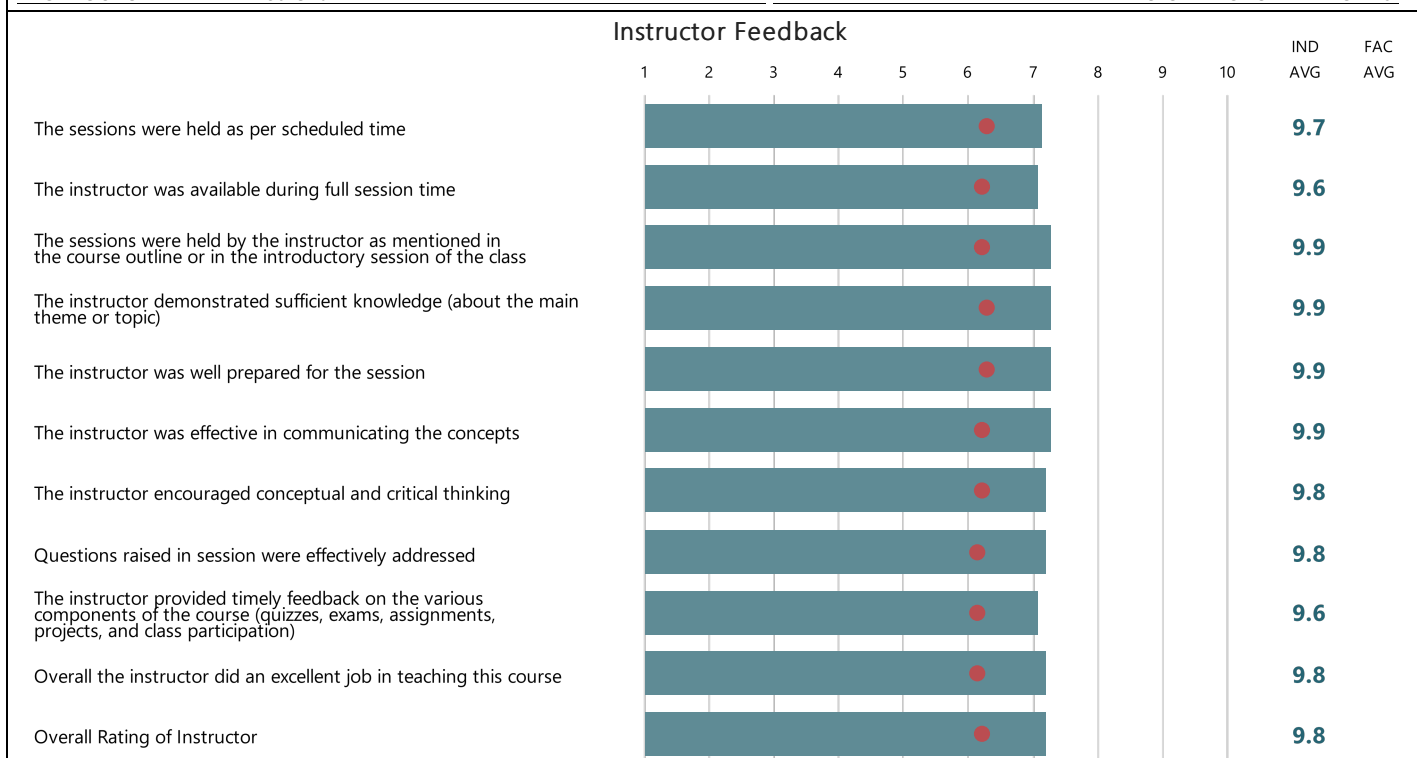

COURSE CODE : AR2033

COURSE TYPE : Studio	NO OF STUDENTS : 16
FACULTY : Faculty of Architecture	NO OF RESPONDENTS : 16

INSTRUCTOR NAME: Vinod Shah

NO OF RESPONDENTS : 16

STUDENTS REGISTERED BY FACULTY

Name Of Faculty	FA	FD	FM	FP	FT	Total
No. of Students	15	0	0	1	0	16
Percentage(%)	94	0	0	6	0	100%

■ **Course Average(COR AVG):** This is the average of the total responses for this course. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Individual Average(IND AVG):** This is the average score of the total responses for this instructor. For example, for Studio IV, out of total 32 students 28 have responded, the Average represents the mean of all 28 responses.

■ **Faculty Average(FAC AVG):** This is the average of all responses for similar course type within the Faculty. For example, Faculty average of Studio IV offered by FA, represents the mean of all responses for Studio courses offered in FA during the given semester.

Scale: 1-3: Unsatisfactory, 4-6: Average, 7-8: Good, 9: Very Good, 10: Excellent

What did you like best about this course?

Sr No.	Comments
1	the course was layed out in layers which made it easier to understand everything
2	The structure of the course
3	This course not only helped me in understanding structures and space in great detail, but it also enhanced my analytical and creative thinking.
4	The exercises were curated well to have a connection among each other and to the larger design exercises
5	Structuring, Format, Teachings, Everything
6	the structure, concept and method of teaching and engaging the students
7	The approach to attempt one single assignment in the best way
8	The layering of different aspects affecting the design and the group discussions
9	At each stage of the course we were completely focused on one aspect of design with the intention of finding something to improve it. The constant learn and modify method of design made me more involved in the process itself. I left this studio with a thirst to learn more about life and architecture.
10	It was the best studio yet. Learnt a lot
11	The approach of dealing with the spatial perception independently and then focusing on structural concepts independently, and then combining the two while both continually affect each other lead to a LOT of essential learning that was missed out on in previous semesters. We learnt about the structural concepts, while practically seeing how they affect the spatial quality and how we can manipulate the structural members to enhance the tectonic expression of the system. The variety of case studies and peer reviews meant that all of us were exposed to all kinds of interesting ways the theoretical concepts were used. In the previous courses we just looked at structures theoretically never once knowing the practical implications. Here we saw how those concepts can be pushed to the brink explored and exploited to achieve magnificent results. I started to actually enjoy architecture here, rather than treating it as a separate aspect of my life. This was all thanks to the two tutors
12	The focus on spacemaking and letting us understand the importance of coexistence between the roofing system and the space beneath.
13	This studio goes beyond being a studio but towards some sort of a life lesson.
14	Great studio for learning basics of designing. covered multiple aspects like structure, site, programme, experience etc
15	Real designing. And applying every step of the studio process to yield the final result
16	the course was well organise and planned in such a way that student gets the best learnings

What would you like to change about the course?

Sr No.	Comments
1	the timings extended after the studio timings on many days which gives no time for break. no proper time schedule is followed.
2	Nothing
3	There is nothing that I would want to change about the course.
4	None
5	Nothing
6	nil
7	1 week of more intense discussion
8	-
9	-
10	Nothing
11	Very difficult to pick anything. Everything contributed to learning in some way even the few misfires that happened.
12	A little bit of vagueness in the first few weeks~
13	that its a studio and not a mandatory.
14	nothing much.
15	Maybe have the tutors review the design at regular intervals so that there need not be any late realisations.
16	i would keep just a point of keeping site vitsis and how things works in pratical life.

Course Comments

2	.
3	The scheduling and timeline of all the exercises in the course was great; it gave students the time to properly absorb and understand one concept at a time and then later apply all those concepts together.
4	nil
5	This studio has made me understand the importance of learning from others, exploring to the maximum and improving through what I am good at instead of imposing other techniques but also using the other techniques sometimes to visualize and modify the design, the importance of process and also revisiting certain steps as and when required,
6	Had a lot of fun
7	This course is great to teach the students in the younger semesters what architecture can truly look like. The beauty and magic of it. How its not just placing functions on a plan and calling it a day. I know im in no position to say this but this course showed me what true architecture is at least as far as my knowledge extends.
8	The course is a well thought of iteration which has been refined throughout the years hence producing good designs original to the student and to the faculty.

What did you like best about this instructor's teaching method / approach?

Sr No.	Comments
1	he teaches very to the point.
2	His ability to explain things clearly, and availability whenever required

3	Professor does not directly give the answers to our queries; he first encourages students to think on their own and come up with the possible options. In this manner, while finding the answer to a particular question, many other doubts get resolved.
4	Explaining concepts with multiple examples helps to understand the concepts better
5	Very keen on helping students in understanding concepts
6	nil
7	His ability to explain structures in the simplest way
8	encourages exploring
9	Professor V.R.Shah never gives away the solutions to any problem easily but instead made me question and find answers. He always made me find a way to enjoy structure which I never did before.
10	Everything
11	I love the way VR sir explains the most complicated of concepts in such a simple manner. Through simple logical steps we reach to the concept that was impossible for us to grasp just a few minutes ago. The one structural engineer who no architect can hate.
12	method of teaching and communicating
13	He is crisp and clear in his discussions.
14	explained very intricate subjects in a very broken down manner, helped students understand them experientially
15	His expertise and fluency in the subject and the clarity and depth with which he teaches is great. Important topics are explained in a simple way rather than making it complicated.
16	his way of teaching is very interesting when it comes to teaching in the most simplest form.

What would be your suggestions to improve the instructor's teaching?

Sr No.	Comments
1	it would be more helpful if uses the terminology not too complex in the beginning so it easier to understand concepts.
2	Nothing
3	I do not have any such suggestions.
4	None
5	Nothing
6	nil
7	nothing
8	-
9	-
10	Nothing
11	Nothing i can think of.
12	sometimes its difficult to hear him as he speaks softly
13	Maybe a little more detailed discussion.
14	not much
15	Nothing
16	no comments he is great at what he teaches.

Instructor Comments

Instructor Name: Vinod Shah

3	He is very approachable and knowledgeable. There were times when I was confused and had the same doubt a couple of times, but he explained it to me with utmost patience.
4	Learnt about structures in a very simple manner and could apply the knowledge due to the exercises which were curated
5	nil
6	-
7	Learnt a lot about structure. Lectures were very interesting
8	From all that sir had taught us, I developed an interest in structures and wish to learn more about it.)
9	supportive and available faulty. explained concepts in detail and always cleared doubts
