3	.
4	Well scheduled and organized.
5	the process of abstraction and tectonic transformation.
6	-
7	The studio relies heavily on observing space through models. It is necessary to have that skill
8	I liked that the course was structured and we could learn a lot in a small amount of time
9	I liked how it gave me sufficient time to explore as many possibilities as I could.
10	Loved everything about the studio

3	.
4	There should be more detailed reviews to resolve our structure.
5	.
6	-
7	There should be more methods of abstraction used other than 2d and 3d diagrams. Something else could be interesting.
8	nil
9	I hope there would be a few more input lectures from structural engineers.
10	If some more classes could be conducted maybe with a structural engineer while resolving the design it could be much more insightful as to what is possible and what isn't and how to go about it.
