[1 - Completely Disagree | 2 - Partially Disagree | 3 - Neither Agree nor Disagree | 4 - Partially Agree | 5 - Completely Agree]

Question	Rating
A1) Teaching :	
29 . The teaching workload undertaken by me are as per the annual work plan	5
30 . The studios & courses taught by me are in my identified area of expertise.	5
31 . I have designed / implemented new studios / courses for offer. OR I regularly update my existing studios / courses to incorporate recent developments and new ideas in the discipline	5
32 . I undertake teaching / guiding adequate number of students for their thesis and DRP? (4 thesis / DRP students per year for full time faculty members, or proportionate)	5
33 . I mentor my students well. (based on student feedback comments)	5
Rationale based on evidence & qualitative comments :	
In this academic year 2023-24 (appraisal year), I have taken one studio and six core and elective courses, including a winter school for the foundation studio in Kuala Lumpur in December 2023. These are per my annual work plan and are identified in my areas of expertise. To make the courses and teaching enjoyable to the students, I keep improving the course materials and PowerPoint presentations and keep my references updated. I often use audio-visual for effective teaching. I have always guided more than 4 FG students for their DRPs along with the PhD scholars. My mentorship has attracted more students to take my DRP proposal to do research with me. This year, the count was four in my area of expertise.	
A2) Studios & Courses :	
34 . During the semester-end exhibition or the winter school exhibition, I have shown the Dean the studio work produced by all my students OR I have shown it at another time.	5
35 . If yes, the average quality of the studio work produced by my students in the studios is striving towards excellence.	5
36 . During the semester-end exhibition or the winter school exhibition, I have shown the Dean the work produced by all my students in courses / electives OR I have shown it at another time.	5
37 . If yes, the average quality of the work produced by my students in the courses is striving towards excellence.	5
Rationale based on evidence & qualitative comments :	

One of the most satisfying and rewarding moments is the semester-end exhibition, where we display student's work guided by us. There is a sense of competition to improve the output of the students in terms of skills in using urban planning tools and techniques, strength of the analysis, visual presentation and straightforward communication. The depth of analysis has always attracted media attention to my Foundation Studio outputs as it involves urban informality and tradeoffs in housing, jobs, and transport. The last two years' display of DRP works has also got visibility and broader dissemination through the end-semester exhibition. The Dean faculty of planning has always appreciated the output of the foundation studio.

A3) Student Feedback :

38 . The average course feedback of courses taught by me is consistently higher than the Faculty average.

5

39 . The average instructor feedback of courses taught by me is consistently higher than the Faculty average.

5

Rationale based on evidence & qualitative comments :

The student feedback for both my course and my teaching has been consistently higher than the faculty average, barring a few instances here and there. Some of my courses achieved more than nine pointers out of ten. The PG Foundation studio has been immensely rewarding in enriching learning experiences and students' feedback, consistently exceeding the faculty average and above nine points. One of my elective courses- Theory of Urbanisation and Cities, has given me colossal learning opportunities with my students. This course is quite popular amongst the university PG students and has always been highly rated by the students' feedback, which goes beyond 9 points.

B) Research :

40 . The research / advisory work conducted by me is strengthening my area of expertise

5

41 . The significance and impact of the research published / disseminated by me is commensurate with the time spent on it (and its value)

5

42 . I have been recognized / awarded for my published / disseminated research / advisory

5

43 . I have published at least one paper in a nationally / internationally recognized peer reviewed journal (or equivalent)

5

Rationale based on evidence & qualitative comments :

The paper on Emerging trends and patterns of urbanisation and its contribution from migration in Gujarat published by the Frontiers Jurnal of Sustainable Cities of Global South has strengthened my areas of expertise as well as given me international visibilities in the domain of urban research across the world, particularly in the Golab south. I actively engage with PhD scholars at the university and outside for their guidance and try to enhance my research ability and expertise by working with them. I have so far guided 2 PhD students outside of the university and am currently supervising one at the CEPT University. The conference paper presented in Geneva on Urban Planning and Public Health: A Case of Trivandrum City during the COVID-19 and Beyond has made my research work visible to the international research policy domain. It was an invited paper for the international Space and Public Health Conference by WHO and UNTACD, United Nations headquarters in Geneva from 1-3 November 2024. This paper is one of my best research studies on the impact of international policy on space and public health. This research contribution was limited to the urban health domain. This research was done as part of DPR with one of my master's students, whose contribution was deeply acknowledged. The current policy research work on the theme of Growth Drivers of Urbanisation for the Urban Policy Commission for the Kerala State will enhance and enrich my engagement and learning in urbanisation and economic development. I have been consistently publishing at least 2 papers in a year, both in national and international journals, for the last five years or so. This year, the count is three.

C) Institutional Role (Faculty - needs to be graded separately) :

44 . I have undertaken and successfully delivered significant Faculty-level institutional responsibility

5

45 . I have made an important contribution as part of my Faculty-level institutional responsibility

5

Rationale based on evidence & qualitative comments :

My role as a Faculty Coordinator of FP Placement for the last eight years has been exceptional. FP placement has consistently been above 75 per cent marks, reaching up to 85 per cent in 2019. Baring COVID-19 years 2020-21, FP placement has reached more than 75 per cent. Some FP programmes, such as MUTS (Transport Planning) and MUH (Housing), have consistently achieved almost 100 per cent placement in the last eight years under my tenure as placement coordinator. This year's placement season is expected to reach 90 per cent by the end of August 2024.

D) Institutional Role (University - needs to be graded separately) :

46 . I have undertaken and successfully delivered significant University-level institutional responsibility	3
47 . I have made important contribution as a part of my University level institutional responsibility	3
Rationale based on evidence & qualitative comments :	
At present, I do not hold any direct university-level responsibility. However, the FP placement coordination does overlap with the university-level placement support system. I always take responsibility for coordinating with the recruiters who come for the other Faculty level placements at the university. There are 17 recruiters, including the big four companies (PWC, Deloitte India, KPMG, and others), and I coordinate the placement at the university level.	
E) Skills :	
48 . I continually demonstrate excellent communication skills in my interaction with peers, other staff members and students	5
49 . I regularly meet deadlines and demonstrates high level of time management skills	5
50 . I regularly demonstrate high level of team-work ability	5
51 . I regularly demonstrate strong analytical and decision-making skills	5
Rationale based on evidence & qualitative comments :	
My deliveries of assigned work are on time in most cases. My professional relationship with colleagues is very cordial, and I am always accepting of them when it comes to working together. My logical and analytical skills help me make prompt decisions and take action on the assigned work.	
F) Personality :	
52 . I am always regular in my attendance and punctual in my time commitments	4
53 . I regularly demonstrate a high level of dependability in terms of the tasks assigned to me	5
54 . I routinely demonstrate a high level of proactiveness, enthusiasm and dynamism with respect to the tasks assigned to me	5
55 . I regularly demonstrate an open-mindedness and respect for diverse opinion of members within and outside of the Faculty	5
56 . I show my commitment to change for continuous quality & process improvement	5
Rationale based on evidence & qualitative comments :	
I am always proactive in taking responsibility and demonstrate high integrity. It has resulted in my enhanced responsibility at the faculty level, such as Placement Coordinator, Internship Coordinator, and FP Convocation Coordinator. Besides, these responsibilities require teamwork and excellent interpersonal relationships with my colleagues. My deliveries of assigned work are on time in most cases. My professional relationship with colleagues is very cordial, and they always accept my ideas and actions when working together.
