

Monsoon Semester, 2017, Faculty of Architecture, CEPT University

Code	1015-B	Course	Architectural Design Studio 8-Habitat Design		
Typology	Studio Type 2	Credits	9	GPA/NonGPA	NonGPA

Long Description :

Is mass housing about massing the houses or housing the masses? Perhaps little bit of both as housing inherently is saddled with apparent dualities of quantitative versus qualitative dimensions. I.e. shelter versus home. Housing constitutes the smallest tissue of the built fabric and as single largest number by the building type is responsible for shaping the builtform character and image of the place. Moreover dwelling is more than a shelter. It has the highest associational bond with the users and ought to be a perfect fit to the individual needs and priorities. With housing shortages estimated at 24.7 million in the year 2007, and expected to rise to 26.53 million by the eleventh planning commission, quantitative dimensions of housing remain critical for countries like India. It becomes even more imperative when 99 percentage of this shortfall is for the EWS (21.78 million) and LIG (2.89 million). As against housing built every year remains only in the order of 1.5 million and that too primarily for the affording group. Overwhelmed by these numbers the policies and products remain driven by the quantitative dimensions rather than qualitative. Quality here does not necessarily refer to strength, light and ventilation translating into shelters, but rather refers to the appropriateness and fit to user's ways of life and aspirations translating into homes. House is a visible symbol of family's identity. Hence, while it gets conceived as standard prototype and produced as mass replication, house essentially calls for the individuality, identity and flexibility to growth and change to adapt to different user needs over time. Housing design has to reflect to this holistically as a habitat design. Various design decisions such as Building type, organisation of open space, design of infrastructure, choice of material and construction techniques have huge impact on qualitative dimensions of the development in rendering it humane, sociable and sustainable. Housing as living environment shapes and influences the societal bond at collective scale and quality of life at the individual scale. It is the critical urban design component through its multiplied accretive processes and the most basic commodity for planning considerations. Thus it is most fundamental to planning, urban design as well as architectural field.

Monsoon Semester, 2017, Faculty of Architecture, CEPT University

Code	1079	Course	History & Theory of Architecture-2		
Typology	Lecture	Credits	2	GPA/NonGPA	NonGPA

Long Description :

EMPHASIS: Codification of knowledge and abstraction in architecture with an emphasis on the Indian context
• Codification into systems of knowledge: design as the application of evolved elements and rules of combination to evolve the common architectural language
• Resultant continuities and their contextual variations
• Type as a cultural response capable of contextual variation
• Relationship with landscape
• the sacred and the social represented in architectural form
• Unified ideologies expressed as abstract principles and regional expressions
• Mathematics, geometry, systems of proportion, symmetry, axuality and regularity as tools of a universal order.
• Design as a conscious creative activity
• the emergence of the architect as a multifaceted artist in singular control of the work. ARCHITECTURAL EXAMPLES
• Hindu architecture
• Islamic architecture
• Parallel European developments (Romanesque, Gothic, Renaissance) SCALES OF ENGAGEMENT Settlement Institutions: Religious, Social, Political Dwelling

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	Introduction - Codification of knowledge in Architecture
Week 2	Islam - Origins of Ideology and its forms
Week 3	Islam in India - Types and Contextual Variations (Study visit to Sarkhej)
Week 4	Islam in India - Language of contextual continuities
Week 5	Islam in India - Language of contextual continuities
Week 6	Early Christian Architecture in Europe
Week 7	European parallels - Romanesque Architecture
Week 8	European parallels - Gothic Architecture
Week 9	European parallels - Renaissance
Week 10	Hindu Temple - Origin of Religion & Type
Week 11	Hindu Temple - Development of Religion & Type
Week 12	Hindu Temple - Language of an occupied form (Study visit to Modhera/Polo)
Week 13	Hindu Temple - Types and Variations
Week 14	Hindu Temple - Types and Variations
Week 15	Language in Architecture
Week 16	Summing up Session and Notes on Exams

Monsoon Semester, 2017, Faculty of Architecture, CEPT University

Code	1095	Course	Mass Housing Issues and Approaches		
Typology	Lecture	Credits	2	GPA/NonGPA	NonGPA

Long Description :

The course is a discussion on key issues of mass housing namely : Housing and socio cultural dimensions (Built in response to human behaviour and cultural traditions) Housing as type that shapes and characterizes urban form Implications and inherent dimensions of Highrise vs. low rise living Successful open spaces in Indian context Participatory design processes Environmental sustainability Densities and site planning PRESENTATIONS: 1) Dwelling forms “ Evolution of housing through 6000 year history to understand environmental, socio-cultural, technological and political factors shaping them. Phases: * PRE URBAN DWELLING FORMS - Ephemeral or Transient Dwelling -Episodical or Irregular Temporary Dwellings -Periodic and Regular Temporary Dwellings -Seasonal Dwellings -Semi permanent Dwellings -Permanent Dwellings * URBAN DWELLINGS_ EARL CIVILIZATION -Indus valley, Mesopotamium, Egyptian, Chinese * URBAN DWELLING “EUROPE -Greek, Roman -Dark ages -Mideaval Ages -Rennaisance -Industrialisation-Bye law housing -Planned Unit Development (Sub urbaia)2) Housing types- understand inherent potentials and limitations of different housing types from detached, semi detached, attached, walk-ups, to high-rise. Especially debate pros and cons of Low-rise Vs. High-rise living and design obligations 3) Open spaces as Civic nodes- Understand type of open spaces and factors that render them successful, plural and intense with activity. Streets, Maidans, Chowks/squares, Yards 4) Site planning “ Housing as integral system of movement, service and built system -Movement network, Infrastructure network, Plotting5) House form variations “ Understand diverse approaches to bring in flexibility and variations in standardised mass production mould. Systems approach to housing. 6) Sustainable Housing “ Integrated designs to optimise and internalise resources through design and construction. -Land, Water, Vegetation, Material, Energy, Waste 7) Housing policies “ Visions, provisions and priorities as observed in National, State and local authority“™s policies and directives. General provisions as well as special policies for city cores, Slums, Heritage precincts, highrises, integrated townships etc.

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	6000years of housing (pre historic & early civilization) 6000years of housing Mideaval, Renaissance, industrial)
Week 2	Highrise vs. Lowrise living Case studies of highrise housing designs approaches
Week 3	Type of open spaces (city to dwelling scale) Case studies of housing with approaches to open spaces
Week 4	Sie Planning issues (movement and infrastructure networks) Demonstration of massing through 3D modelmaking
Week 5	Houseform variations Participatory design approaches
Week 6	Environmental sustainability Case study- diverse approaches to resource management
Week 7	Introducing design exercise Introducing design exercise
Week 8	Review of design models Review of design models
Week 9	tbd
Week 10	tbd
Week 11	tbd
Week 12	tbd
Week 13	tbd
Week 14	tbd
Week 15	tbd
Week 16	tbd

Monsoon Semester, 2017, Faculty of Design, CEPT University

Code	2088	Course	Textile in Interiors		
Typology	Workshop	Credits	2	GPA/NonGPA	NonGPA

Long Description :

The course introduces the students to the use of textile in interiors.

Monsoon Semester, 2017, Faculty of Design, CEPT University

Code	2518	Course	Architecture in Post-Independence India		
Typology	Lecture	Credits	2	GPA/NonGPA	NonGPA

Long Description :

There was a drastic change politically as well as economically post Independence. The cultural aspect of this period played major role changing the outlook of India. Political aspect emerged while economy got developed and hence the search the roots of cultural evolution, rich vernacular and regional style. JJ School of Art and Architecture is pre-independence and follows old school of thought, School of Architecture “ brought modernistic approach “ Chandigarh “ Bhubaneswar “ planned city, post-independence British architects “ continuity to the old style “ revivalist style, architects trying to give new identity to India “ modernist approach “ perhaps an identity crisis“a dilemma whether to flow with the glory of the past or move forward with times using new ideas “ techniques “ Kahn, Corbusier and their disciples. The course will look at all such aspects which have been the reason of development of India architecturally.

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	Nehru's India and Readings of "Discovery of India"
Week 2	Architecture and Education
Week 3	Bhubaneswar and its designs impact on the overall scenario of the country's architecture
Week 4	Chandigarh and its significance and Example of Gandhinagar
Week 5	Punjabi Baroque and rise of Middle class
Week 6	The reading of Book The Low Land, lecture by an Outsider
Week 7	The Advertising in India
Week 8	Europe in 1968 and its implications in India
Week 9	India in last 25 years and its scenario in other fields except Architecture
Week 10	Lecture by an outsider "When Poet Meets the Prophet"
Week 11	Sell of Indianness and acceptance of "Foreign"
Week 12	Return to the Readings of Nehru and its standing in present times, caste, race, creed and the irony of the present situation in the country Part I
Week 13	Return to the Readings of Nehru and its standing in present times, caste, race, creed and the irony of the present situation in the country Part II
Week 14	Rise of India in Technology and supportive systems
Week 15	Music and its importance in Indian Society, Bollywood and others
Week 16	India at the Pause " Political, cultural and Economical
