

Spring Semester, 2019, Faculty of Architecture, CEPT University

Code	AR3006	Course	Terrain-Vague Bricolage Herbarium in an abandoned quarry at Champaner		
Typology	Studio	Credits	14	GPA/NonGPA	GPA

Long Description :

Abandoned quarry sites form a large part of the urban and sub-urban spaces, especially in Gujarat and Rajasthan. Quarries are a reflection of ceaseless exploitation of natural resources using violent methods such as dynamiting to the extent that the landscape becomes distressed. Such landscapes offer a renewed opportunity to put back the ecological process in order by landscape reshaping which is favorable for the ecosystem, local economy, and improvement of people's living standards. In that definition, post-industrial landscape has the potential of making us reflect upon the fluid and porous distinction between value and waste. It offers an opportunity to assemble new spatial meanings from found objects of abandoned quarries by bricolage—piece-by-piece building a whole. The architectural design thus becomes the domain of the bricoleur who creates a complete structure by means of environment and materials at hand. The studio proposes re-appropriation and remodeling of the distressed ecological components of an abandoned quarry site into a place for research on flora and a repository for bio-resource information and the plant specimens of the region. For this, the studio focuses on mapping the spatial system of quarries, mapping the materiality of the landscape, developing hybrid/composite building material systems using found objects such as stone, vegetation, et al. Subsequently, the studio proposes a design using bricolage as a tactical tool for reclaiming [appropriation] and rewriting the materiality and spatiality [re-territorialisation] of the quarry. Site: Abandoned basalt quarries in the World Heritage Site of Champaner-Pavagadh Archaeological Park. Project: Architectural design for a Herbarium 1500 sqm

Learning Outcomes :

After completing the Courses, the student will be able to :

- Develop a method to evaluate post-industrial landscapes as a system of elements, human condition, and material resources that can address contemporary concerns of urban ecological distress
- Generate an ecologically responsive material specific architectural form using collage technique
- Learn to use collage as a generative tool for architectural analysis and design

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	introduction Create a materialist case for inorganic/organic components for ecological equilibrium using collage
Week 2	Create a materialist case for inorganic/organic components for ecological equilibrium using collage
Week 3	Mapping Redundancies: Map the topography, geological characteristics of the abandoned quarry
Week 4	Mapping Redundancies: Map the topography, geological characteristics of the abandoned quarry

Week 5	Hybrid-material exploration: establish relation between material structure, scalar configurations, and surface effects Develop a design brief
Week 6	Hybrid-material exploration: establish relation between material structure, scalar configurations, and surface effects
Week 7	Bricolage of material palette and spatial configurations of ecological ruins of the stone quarry
Week 8	MID TERM
Week 9	Generate catalog of hybrid-material, spatial conditions, and surfaces available for intervention
Week 10	Generate catalog of hybrid-material, spatial conditions, and surfaces available for intervention
Week 11	Develop architectural proposal
Week 12	Develop architectural proposal
Week 13	Develop architectural drawings/models
Week 14	Develop architectural drawings/models
Week 15	Develop architectural drawings/models
Week 16	Develop architectural drawings/models

Spring Semester, 2019, Faculty of Design, CEPT University

Code	IR2701	Course	Craft in Interior Architecture		
Typology	Courses	Credits	2	GPA/NonGPA	GPA

Long Description :

Crafts in India extend beyond the tangible boundaries of skill, workmanship, and other physical aspects. Indian craft is a reflection of the immense creativity of ordinary people in the quest for self-expression and contentment. India has been known as a land of crafts and craftsmen (Chattopadhyay, 1980). The crafts and craftspeople of India are an integral part of vernacular traditions and historical assimilations which has spanned over many millennia. This course will give an overview of the crafts, its typologies, its application within the Interior Architecture domain, along with the process of mapping, documentation, intervention and a brief overview on the policy parameters.

Learning Outcomes :

After completing the Courses, the student will be able to :

- Assignment Plates - Mapping and Identifying Crafts
- Assignment Plates - Documenting and Analysing Crafts

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	Overview of crafts
Week 2	Re-defining Building Crafts
Week 3	Craft In Interior Architecture
Week 4	Application of Building Crafts
Week 5	Craft Mapping and Documentation
Week 6	Fieldwork exercise
Week 7	Mid Semester Review
Week 8	Craft Intervention
Week 9	Craft policy framework and parameters
Week 10	Fieldwork exercise
Week 11	Fieldwork exercise
Week 12	Final Review

Spring Semester, 2019, Faculty of Architecture, CEPT University

Code	LA4601	Course	History and Theory of Landscape Architecture		
Typology	Courses	Credits	2	GPA/NonGPA	GPA

Long Description :

The objective of the course is to introduce the students to the broad history of landscape architecture through the study of selected sites; and to build a critical understanding of these works by initiating a full 'reading' of these places – in terms of historical and cultural context, perception and 'representation'. Students are also introduced to selected texts that help in examining the sites; and simultaneously invoke broad themes in the discourse of landscape architecture, that may continue to have relevance and meaning.

Learning Outcomes :

After completing the Courses, the student will be able to :

- Familiarity with historically important and exemplary landscape projects : as well as critical texts
