

Monsoon Semester, 2023, Faculty of Architecture, CEPT University

Code	AR3039	Course	Place for Prayer		
Typology	Studio	Credits	14	GPA/NonGPA	GPA

Long Description :

After completing the studio, the student will be able to achieve the following; The studio is going to concentrate most essentially and primarily to create an architectural language and work on strong premise to make subtle and yet a bold statement for the project brief. In order to achieve this basic goal, studio will take help of several exercises, to first try and understand what are the requirement of this space and how to achieve the same. To make supportive group readings on the subject, be it of any reference. This is crucial as the references of these readings will give clues to go further in the project. The third will be to have site visits of case studies and the chosen site to explore its context, consider climate (mainly sun movement for natural light) and then the study and exploitation of appropriate material. Several iterations and design development of the concept would give challenges to the imagination and reality with which the student would be working on. To create a synergy and synthesis with the aspects of architecture, be it spatial or physical, be it tangible or intangible aspects and be it positive or negative. The final design would be able to display the inherent aspects of architecture and try to achieve its goal.

Learning Outcomes :

After completing the Courses, the student will be able to :

- Develop a for the project and translate into spatial configuration. Integrate an issue or concern within the narrative.
- Analyze a case study through the lens of narrative in architecture. Visualize site analysis and program.
- The ability to explore through iterations, variations and modifications at all stages of design. To demonstrate the iterations.
- Demonstrate the ability for designing spaces that include responses to climate, material, structure, immediate physical context over and above the conceptual and thematic emphasis.
- To be able to map spatial location based on intent

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	Understand the brief and have discussion on how to proceed
Week 2	Reading the first main references and explore their case studies
Week 3	Reading second main reference and explore the case studies
Week 4	Start putting ideas on the paper, make exercises which help to make the imagination; derived from the above references. Internal Jury
Week 5	Create a strong and substantial premise and work towards the brief. Make block model studies and help from available technologies
Week 6	Work back words and go through the references to make the stronger design approach. Internal Jury

Week 7	Explore the site constraints and develop a design language to make it work for the program. The use of light, material and structural system
Week 8	First design idea the concept and basic school of thought Internal Jury
Week 9	Iterations initial design and design development. The concept to be freeze by now.
Week 10	The design must follow the guide lines made during previous weeks and in order to do so will have several similar parallel examples to probe deeper in the studio brief. Internal Jury
Week 11	Design development for context, constraints, material, structure
Week 12	Design development for appropriateness of all designed aspects and develop and exploit the aspects chosen as premise
Week 13	Design development for appropriateness of all designed aspects and develop and exploit the aspects chosen as premise
Week 14	Learn to Represent the project, and samples shown to demonstrate how to put across the point of views
Week 15	Preparation of visualisation for jury
Week 16	Final Jury

Monsoon Semester, 2023, Faculty of Architecture, CEPT University

Code	AR2732	Course	Beginner's Class: Wheel Thrown Pottery		
Typology	Courses	Credits	2	GPA/NonGPA	GPA

Long Description :

Building ceramic forms is both challenging & innovative process that brings out a gamut of creativity. It invites practitioner into a world of tactile possibilities. This course introduces students to basic level skills, techniques & processes of clay and ceramics. It is a workshop based course that explores form building techniques through wheel thrown exercises. It introduces students to various processes of ceramics including clay preparation, slip application, decoration and kiln firing. As students gather the skills of the medium, the learnings help them to understand the physical properties of clay and its creative scope. It's an opportunity to experience hands-on wheel pottery and explore clay forms using potters wheel as a tool to design. They will develop various shapes with focus on form, proportion, function, details of handles, lids, knobs. They will learn to prepare and knead clay and experience loading and firing of electric kiln. Students will also intensively study pottery designs through sketching and drawing of functional wares in ceramics. Students will practice basic steps of throwing clay starting from wedging, kneading and centering clay on an electric potter's wheel to create basic shapes of bowls & mugs. They will be introduced to detailing and finishing that includes turning and trimming a pot, adding a clay handle. The course gradually moves to focus on creating sculptural & pottery forms with a focus on wheel pottery and surface decoration where the students are encouraged to develop further a style of forms as the final project. Final project will allow students to practice the learnings and present their individual creative expression. At the end of the course, students will have gained beginner's proficiency in throwing on potters wheel.

Learning Outcomes :

After completing the Courses, the student will be able to :

- Demonstrate skills to create, form ceramicware
- Exhibit aesthetic sensibility for ceramics material
- Communicate basic ceramic vocabulary with craftsperson

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	Introduction to Clay, Clay preparation, Wedging, Kneading Introduction to Pinch Technique Exercise 1 Pinched Forms Slip Recipe Test
Week 2	Introduction to Tools & Equipments Introduction to Centering Basics
Week 3	Introduction to Opening & Wall Pulling
Week 4	Introduction to Forming Cylinder
Week 5	Introduction to Trimming & Turning the pots
Week 6	Mid semester Grading Throwing a Plate
Week 7	Creating a lidded pot
Week 8	Adding handles & Knobs

Week 9	Double Walled Pot throwing
Week 10	Final Project Claywork Creating a Thrown Set like a Kettle with spout and handle
Week 11	Final Firing & Documentation
Week 12	Online & Offline Submission & Grading

Monsoon Semester, 2023, Faculty of Planning, CEPT University

Code	UR2702	Course	Rediscovering Ahmedabad		
Typology	Courses	Credits	2	GPA/NonGPA	NonGPA

Long Description :

Ahmedabad is now a heritage city. Its 611 year old history is full of fascinating stories, legends and myths. This course deals with learning a bit about the factual history and more so the oral history and its many versions. The focus will be on medieval Ahmedabad, a bit of history and lots of stories, myths and legends about the city, its founder Sultan Ahmedshah and the Sufi saints of that era who influenced the shaping of the city and its culture. All the classes will be held outside of CEPT campus, mostly in the old city and other historically suburban areas. There will be field visits, talks, story- telling sessions and discussions which will be followed up by further exploring the place and speaking to local people to gain more insight, discovering and documenting the oral history and other stories. We will be going on tour of the various historical sites and narrating the various stories. Imp: students will have to be willing to visit historical or important sites and interact with people. In the current scenario it is permissible to go out and work and it would be deemed safe if one is taking all the necessary precautions.

Learning Outcomes :

After completing the Courses, the student will be able to :

- Conduct Interviews and Document the oral history of the city.
- To Determine importance of history and the local heritage.
- To first hand gain insights into People, Place and Culture.
