

Monsoon Semester, 2021, Faculty of CEPT Foundation Program, CEPT University

Code	CFP001	Course	Studio I & Field Studio		
Typology	Studio	Credits	15	GPA/NonGPA	NonGPA

Long Description :

The Monsoon semester focuses on equipping students with various techniques to visualise, draw and represent. The students also start to engage with existing buildings to identify various building elements, basic construction materials and methods. They practise and work intensively to perfect their freehand drawing and perspective drawing, to visualize and draw complex compositions. They also learn to make technical drawings using orthographic projections, surface development and the exploded view of a complex object. A series of exercises in sketching will enable the students to sketch freely in order to observe, document, imagine and improvise. The exercise on gauging sizes will develop the habit of estimating sizes using one's body and through it the students will begin to engage with the concept of anthropometrics. Through the exercise on building elements and materials the students will start to engage with existing buildings to decipher their building elements and materials and understand the sequence of construction. In the last exercise the students will go through the process of documenting an existing building and making a set of architectural drawings.

Learning Outcomes :

After completing the Courses, the student will be able to :

- The students will be able to judge and draw freehand neat, correct and proportional parallel lines of varying intensities, construct basic geometric shapes and complex 3D geometric forms.
- The students will be able to draft plans, elevations and sections and do surface development using appropriate tools and with an understanding of orthographic projections and also draw an exploded view of an object with an understanding of its assembly
- The students will develop the ability to estimate/gauge sizes and draw objects, furniture, building elements, spaces and volumes in correct proportions.
- The students will be able to use the correct nomenclature for building and architectural elements and to identify common construction materials.
- The students will be able to document an existing building through sketches, measure drawing and sets of architectural drawings like plans, sections, elevations, wall sections and representation drawings.

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	1
Week 2	5
Week 3	3
Week 4	2
Week 5	5
Week 6	4

Week 7	2
Week 8	4
Week 9	3
Week 10	6
Week 11	1
Week 12	2
Week 13	8
Week 14	7
Week 15	6
Week 16	9

Monsoon Semester, 2021, Faculty of CEPT Foundation Program, CEPT University

Code	CFP002	Course	ROWC I		
Typology	Courses	Credits	3	GPA/NonGPA	NonGPA

Long Description :

Communications is a workshop-based course component geared towards providing basic written and oral communication skills for design, architecture, urban design and construction technology students. Targeting specific skills required to engage with design-related disciplines, the course component involves working through a guided reading and writing process, which introduces different reading and writing techniques incrementally, and in relation to concrete tasks. The students work on describing objects and spaces, to hone their abilities to identify and articulate pertinent aspects which they must begin to focus on as young professionals. They also take off from their studio work to present their reflections on the learning process, or on the outcome, in ways which would enable a viewer to engage with it more meaningfully. The Monsoon semester also sets the stage for research, introducing and practising reading techniques that help identify materials, reading actively, in ways that enable one to remember, annotating and compiling working bibliographies and preliminary concept notes. The evolution of the quality of writing and presentation is captured through individually compiled booklets, which work as a hands-on opportunity to think through the way one anticipates the experience of a reader, as well as an opportunity to reflect on one's own work, and aspects which need strengthening.

Learning Outcomes :

After completing the Courses, the student will be able to :

- The students will be able to write brief descriptions of objects and spaces, using language without jargon, and bringing together text and image
- The students will be able to engage in the initial steps of the research process, involving skimming, annotating texts, mapping relevant ideas in singular and multiple texts, and articulating questions which can anchor research.
- The students will be able to present their work through brief pieces which can work as introductions to exhibitions or portfolio sections.

Monsoon Semester, 2021, Faculty of CEPT Foundation Program, CEPT University

Code	CFP003	Course	Perspectives I		
Typology	Courses	Credits	2	GPA/NonGPA	NonGPA

Long Description :

Perspectives: An Introduction to the Arts and Social Sciences is a course component of the CEPT Foundation Programme, intended to provide an opportunity for the students to step out of the familiarity of their design-related disciplines and engage with others that they may not otherwise come across. The course component is structured as a lecture series inviting experts from different fields, ranging from poetry to Indian classical dance from different regions and belonging to different traditions, to classical music, or fusion. It also includes writers and plastic artists as well as translators, curators and art critics, all of whom would be able to introduce first-year students to the basic concepts and approaches required to begin to engage with a new field. The course component is loosely structured and allows the students to engage creatively, or reflect on the experiences brought to them by the guest lecturers. These engagements are starting points for connecting these new fields with their own future practice, as well as reminders that any discipline may provide points of contact and inspiration for one's own work.

Learning Outcomes :

After completing the Courses, the student will be able to :

- The students will be familiar with disciplines other than their own, and will begin to understand the basics of their principles or what goes into the appreciation of works pertaining to these disciplines
- The students will reflect on their engagement with the works presented by the speakers, to produce either original work or critical commentary.

Spring Semester, 2022, Faculty of CEPT Foundation Program, CEPT University

Code	CFP004	Course	Studio 2		
Typology	Studio	Credits	15	GPA/NonGPA	NonGPA

Long Description :

Studio (II), within the CEPT Foundation Programme continues to build upon the skills acquired during the first semester, adding abilities to use digital media in representation; to make models; to engage with urban space through mapping and data representation; to understand the assembly of built form through its building elements, materials and structures; to be able to draft architectural and topographical drawings: and eventually leads to bringing the skills and abilities together to tackle a design problem. After a first semester that still had to bear the constraints of the pandemic with teaching in a hybrid mode, the second semester brings an emphasis on experience building elements and materials through a hands-on workshop at Hunnarshala, and practical engagement with the workshop at CEPT. After focusing on developing drawing and representation skills in first semester, during the second semester, the CFP Studio component focuses on building analytical abilities with exercises like mapping and data representation, building elements and materials, making and testing structures, technical drawing II and tackling a design problem. These skills will be put to use during L2 studios, and will be discussed in their relevance to the professional practice that designers, architects and urban planners engage in.

Learning Outcomes :

After completing the Courses, the student will be able to :

- adadasdasdasdasdasdasdasdasdasd

Weekly Plan & Assessment :

Weeks	Exercise Description
Week 1	S7
Week 2	S12
Week 3	S13
Week 4	S14
Week 5	S16
Week 6	6
Week 7	7
Week 8	8
Week 9	9
Week 10	10
Week 11	11
Week 12	12

Week 13	13
Week 14	14
Week 15	15
Week 16	16

Spring Semester, 2022, Faculty of CEPT Foundation Program, CEPT University

Code	CFP005	Course	ROWC 2		
Typology	ROWC	Credits	3	GPA/NonGPA	GPA

Long Description :

The course component builds on the knowledge and skills acquired during the first semester, in closer connection with the studio component, to enable the students to articulate their concerns and learnings through their work, while simultaneously providing an opportunity to further explore the concerns and practices of designers and architects who form part of the canon, and evolve research strategies to learn about key designs. Individual writing is geared towards developing habits of self-critique and providing and working with peer feedback. It continues to build the knowledge of different genres, requiring the students to refine their understanding of working with text, looking at different types of readership and the way these determine the register and style of the writing; at narrative and descriptive techniques; at the structures through which arguments can be articulated and substantiated. The course forms the habit of conducting ongoing research and integrating knowledge acquired in other course components in the articulation of the students' understanding and individual exploration of the legacy of design, architecture , urban planning and construction technology

Learning Outcomes :

After completing the Courses, the student will be able to :

- The students will be able to communicate effectively regarding the processes and learning taking place through the Studio exercises. They will develop the skills to write brief, persuasive descriptions. They will further develop skills towards conducting research, and becoming more familiar with key designers and designs and communicating a sense of this familiarity through essay forms.

Spring Semester, 2022, Faculty of CEPT Foundation Program, CEPT University

Code	CFP006	Course	Perspectives 2		
Typology	ROWC	Credits	2	GPA/NonGPA	GPA

Long Description :

Perspectives: An Introduction to the Arts and Social Sciences continues the process of developing familiarity with ways of understanding and representing the world which pertain to disciplines not directly addressed in their curriculum. Visual representation in arts, varying from painting, to graphic novels and art which is accessible to a broader public, are particularly relevant to design disciplines, while their particular requirements allow them flexibility in artistic expression. Through discussions with experts in these disciplines, the students learn to read visual image not only as designers, but also through an art-specific perspective. Music offers an equally engaging opportunity, where the introduction to the rhythms and harmonies, along with the politics of various genres offer entry points into their appreciation. Once again guided by critics and practitioners, the talks and demonstrations bridge the realms of the visual and auditory. The lecture series also sees speakers from design-related disciplines, introducing aspects of contemporary practice, looking at their critical concerns and the use of sketches, drawings and written words to conceptualize and represent.

Learning Outcomes :

After completing the Courses, the student will be able to :

- The students will become familiar with disciplines other than their own, and begin to understand the processes involved in creating and analysing different types of works of art, crafts, and (social) science practices.
